**Note: Additional Processor Upgrade licenses are no longer required for UnixWare 7.1.4. Customers that need to add processors should instead visit the SCO Download site to obtain an update which will increase their processors to 32. The web site is located at http://www.sco.com/support/update/download/release.php?rid=320or via FTP at:
ftp://ftp.sco.com/pub/unixware7/714/patches/ptf9054a**

UnixWare 7.1.4 OpenServer Kernel Personality (OKP) Licenses

The OKP add-on supports the installation of a full OpenServer application environment on UnixWare 7.1.4 including emulation support for most Xenix applications in use with OpenServer today. The Lite version is a no-charge add-on which may be used to directly migrate an existing OpenServer 5.0.4 through OpenServer 5.0.7 system along with already installed applications and data files. The Full version provides a fresh OpenServer 5.0.7 image for installation on UnixWare 7.1.4. This option is a good choice for customers who want to move a limited number of applications and also move to the latest release of OpenServer on UnixWare.

Product Name	Media	Product Model	Web Model	Eur€List
OKP LITE - Migration Version Activation Key	In Media Kit	N/A	N/A	NO-FEE
OKP FULL - Includes fresh OSR5.0.7 Image	License Pack	LA417-UW00-1.0	LA417-UW00W-1.0	€ 217

UnixWare 7.1.4 Standard Upgrades and Trade-Ins

The following license are required to upgrade current UnixWare 7.1.1 and later systems to UnixWare 7.1.4.**Note that upgrades to UnixWare 7.1.4 are Edition Specific and may only be used to upgrade the matching current Edition.**Updgrades may be applied directly to a running system. Trade-Ins are also available from older UnixWare systems and from OpenServer or SCO Unix systems. A trade-in will require a fresh install of UnixWare 7.1.4. Trade-ins may require a supporting proof of purchase for the original system. Contact your SCO Sales Office for requirements that apply in your region or for information about trading in from competitive products.

UnixWare Release 7.1.4 Upgrades - Upgrades are Now Edition Specific

Upgrades to UnixWare 7.1.4 from UnixWare 7.1.3 and UnixWare 7.1.2 (OpenUNIX 8)

Product Name	Media	Product Model	Web Model	Eur€List

Reliant®HA 1.1.4

ReliantHA is a clustering solution for enterprises requiring high levels of application and data availability. ReliantHA increases the overall availability of applications and critical data by connecting multiple servers together as nodes within a single high-availability fail-over cluster. Applications do not need to be aware of the operation of the cluster, and all nodes within the cluster may be used simultaneously for processing. Each node in the cluster needs to be licensed.

Single Server License	License Pack	LA490-0001-1.1	LA490-0001W-1.1	€ 2.609

Special Reliant HA Clustering Bundles

2-Node Bundle for UnixWare 7.1.4	License Pack	LB490-UW00-7.1.4	LB490-UW00W-7.1.4	€ 5.045

Includes two (2) UnixWare 7.1.4 Business Edition operating system licenses and two (2) ReliantHA Single Server licenses.

SCO OpenServer 6

Product Name	Media	Product Model	Web Model	Eur€ List

Description: SCO OpenServer® 6 is the most advanced version of the OpenServer family of operating system products. In addition to the new SVR5 kernel, major new features, markedly improved performance and support for the latest hardware, this release introduces significant enhancements to the default configurations for the Enterprise Edition and introduces a new Starter Edition designed for small business and edge of network applications. The Starter Edition replaces the Host and Desktop Editions.

SCO OpenServer 6 Upgrades and Trade-Ins

Upgrades: Upgrade licenses allow customers of OpenServer 5.0.7 and 5.0.6 to upgrade to OpenServer Release 6. All upgrades will require a fresh install of OpenServer 6. In-place upgrades are not currently supported. New for OpenServer 6 is the fact that all upgrade licenses are "Edition Sensitive" meaning that the correct license is required which corresponds to the Edition being upgraded. Two separate sets of upgrade licenses are available; one for upgrades from OpenServer 5.0.7 systems and one for OpenServer 5.0.6 systems. All CPUs, additional users, and Development Systems licenses will still be usable with OpenServer 6. Customers with SCO Update for OpenServer 5.0.7 will be able to use their SCO Update licenses in place of the corresponding upgrade license. Note: When using an Upgrade license to OpenServer 6, customers will be required to enter the current license for the system they are upgrading in addition to the Upgrade license.

Trade-Ins: All versions of OpenServer Releases 5.0.0 through 5.0.5 require a Trade-In license to bring the system current with OpenServer Release 6. Trade-Ins from earlier releases are not available. User licenses must be traded in as well. These licenses are available under the heading OpenServer 6 Trade-Ins. Customers with older variant 16-, 32-, 64-, 128-, and 512-User server licenses should contact their SCO representative to have these licenses converted to the appropriate combination of OpenServer 6 User Licenses.

SCO OpenServer 5.0.7 Upgrades and Trade-Ins

Contact your SCO Sales Office for requirements that apply in your region or for information about trading in from competitive products.

Current Customer Upgrades from Release 5.0.6

Upgrade: Upgrade licenses allow **only** customers of SCO OpenServer 5.0.6 to upgrade to SCO OpenServer Release 5.0.7. All CPUs, additional users, Optional Services components, and Development Systems will remain valid when the installation of the new license is completed.

Trade-In: **SCO OpenServer Release 5.0.5, Releases 5.0.4 through 5.0.0, or any release of SCO OpenServer 3, SCO Open Desktop, SCO UNIX, or SCO XENIX require a Trade-In license to bring the system current with SCO OpenServer Release 5.0.7.** User licenses, and CPU licenses must be traded in as well. These licenses are available under the heading Current/Previous Customer Trade-Ins. Customers with older variant 16-, 32-, 64-, 128-, and 512-User server licenses should contact their SCO representative to have these licenses converted to the appropriate combination of SCO OpenServer 5 User Licenses.

NOTE: Using an Upgrade or Trade-In license to SCO OpenServer Release 5.0.7, and selecting any of the Fresh installation options, you will need the current license for the system you are upgrading in addition to the Upgrade license. If you are using the Upgrade installation option, you only need the Upgrade license. See Late News at http://www.sco.com/support/docs/openserver for more information.

Inter-Edition Trade-In: Customers wishing to migrate from an SCO OpenServer Desktop or SCO OpenServer Host System to the SCO OpenServer Enterprise System must also purchase an Inter-Edition Trade-In license as well as an Upgrade or Trade-In license, to bring the system up to the current SCO OpenServer Release 5.0.7. These Trade-Ins result in a 5-User Enterprise System license. Any additional SCO OpenServer Release 5 User Licenses, CPU licenses applied to the original Host System will also apply to the Enterprise System. If trading-in from a pre-Release 5.0.7 system, the appropriate Current Customer Upgrade or Previous Customer Trade-In to Release 5.0.7 must first be purchased, for example from Host 5.0.4 to Host 5.0.7, and then to Enterprise 5.0.7.

SCO*office* Server

Product Name	Media	Product Model	Web Model	Eur€List

Description: SCOoffice Server 4.2 delivers a reliable, full-featured Internet e-mail and collaboration solution for SCO UNIX servers. Designed with comprehensive security features, SCOoffice prevents e-mail viruses from reaching users, filters out junk e-mail, and secures e-mail access. Providing more than just e-mail services, SCOoffice also delivers a real-time collaboration solution for scheduling group meetings, sharing contact lists and address books, and managing group to-do lists and tasks. For convenience, SCOoffice integrates with Microsoft Outlook and industry-standard Web browsers. Empowering non-technical users such as office managers, secretaries, and assistants, SCOoffice features a friendly interface for setting user and environment preferences. SCOoffice Server 4.2 is compatible with SCO OpenServer 6 and UnixWare 7.1.4.

Development Products

UnixWare & OpenServer

Product Name	Media	Product Model	Web Model	Eur€ List

Qualified SCO developers can purchase SCO development products at a discount through the SCO Developer Program. Information is available from http://www.sco.com/developers/.

Development System Licenses

OpenServer 6 Development System	License Pack	LA205-UX00-6.0	LA205-UX00W-6.0	€ 86

The SCO OpenServer 6 Development System provides an updated set of compilers and tools that enable rapid development, deployment and maintenance of applications for OpenServer 6. The compilers from the OpenServer 5.0 Development System and the UnixWare OpenServer Development Kit (UDK) have been "married" to provide a single set of compilers capable of producing SVR5 mode or OSR5 mode ELF object files, libraries and executables.

A separate new license is required for the OpenServer 6 Development System.

SCO OpenServer 5 Development System	License Pack	LA105-UX50-5.0.7	LA105-UX50W-5.0.7	€ 521

This development system is only intended for the continued development of legacy applications, COFF binaries, and SCO OpenServer 5 native device drivers. For new development, one of the other development systems should be used.

UnixWare and Open Server Development Kit	License Pack	LA405-UW00-7.1.4	LA405-UW00W-7.1.4	€ 521

The UnixWare 7.1.4 and OpenServer Development Kit (UDK) contains C and C++ compilers and the graphical debug tool that enables the rapid development of applications for UnixWare Release 7.1.4.

This kit can be used to develop applications that can also be deployed on all prior releases of UnixWare 7. The Compatibility Modules for SCO OpenServer™ continue to be supported with this development kit. The new kit can also be used to create binaries for SCO OpenServer Release 5.0.6 and Release 5.0.7. The new UDK may be installed on a UnixWare 7.1.4, UnixWare 7.1.3, UnixWare 7.1.2 (OU8), UnixWare 7.1.1, OpenServer 5.0.6 or an OpenServer 5.0.7 system as a free upgrade if the UnixWare and OpenServer Development Kit has been licensed on the system; otherwise a license key for the UDK will be required.

Media and Documentation Kits

UnixWare and OpenServer Development Media Kit*	CD-ROM	CA205-XX09-5.0.7	Not Available	€ 43
SCO OpenServer 5 Development System Documentation**	Manual	MC105-UX00-5.0.7	Not Available	€ 170
