UnixWare 7.1.4 OpenServer Kernel Personality (OKP) Licenses

The OKP add-on supports the installation of a full OpenServer application environment on UnixWare 7.1.4 including emulation support for most Xenix applications in use with OpenServer today. The Lite version is a no-charge add-on which may be used to directly migrate an existing OpenServer 5.0.4 through OpenServer 5.0.7 system along with already installed applications and data files. The Full version provides a fresh OpenServer 5.0.7 image for installation on UnixWare 7.1.4. This option is a good choice for customers who want to move a limited number of applications and also move to the latest release of OpenServer on UnixWare.

OKP LITE - Migration Version Activation Key	In Media Kit	N/A	N/A	NO-FEE	NO-FEE
OKP FULL - Includes fresh OSR5.0.7 Image	License Pack	LA417-UW00-1.0	LA417-UW00W-1.0	\$249	€ 217

UnixWare 7.1.4 Standard Upgrades and Trade-Ins

The following license are required to upgrade current UnixWare 7.1.1 and later systems to UnixWare 7.1.4. **Note that upgrades to UnixWare 7.1.4 are Edition Specific and may only be used to upgrade the matching current Edition.** Upgrades may be applied directly to a running system. Trade-Ins are also available from older UnixWare systems and from OpenServer or SCO Unix systems. A trade-in will require a fresh install of UnixWare 7.1.4. Trade-ins may require a supporting proof of purchase for the original system. Contact your SCO Sales Office for requirements that apply in your region or for information about trading in from competitive products.

UnixWare Release 7.1.4 Upgrades - Upgrades are Now Edition Specific

Upgrades to UnixWare 7.1.4 from UnixWare 7.1.3 and UnixWare 7.1.2 (OpenUNIX 8)

UW714 Base Edition from UW713/2 Base Edition	License Pack	LX400-4200-7.1.4	LX400-4200W-7.1.4	\$299	€ 260
UW714 Business Edition from UW713/2 Business Edition	License Pack	LX400-4300-7.1.4	LX400-4300W-7.1.4	\$419	€ 365
UW714 Departmental Edition from UW713/2 Departmental Edition	License Pack	LX400-4700-7.1.4	LX400-4700W-7.1.4	\$683	€ 594
UW714 Enterprise Edition from UW713/2 Enterprise Edition	License Pack	LX400-4600-7.1.4	LX400-4600W-7.1.4	\$1,499	€ 1.304
UW714 Data Center Edition from UW713/2 Data Center Edition	License Pack	LX400-4100-7.1.4	LX400-4100W-7.1.4	\$2,999	€ 2.609

Upgrades to UnixWare 7.1.4 from UnixWare 7.1.1

UW714 Base Edition from UW711 Base Edition	License Pack	LX400-4201-7.1.4	LX400-4201W-7.1.4	\$479	€ 417
UW714 Business Edition from UW711 Business Edition	License Pack	LX400-4301-7.1.4	LX400-4301W-7.1.4	\$539	€ 469
UW714 Departmental Edition from UW711 Departmental Edition	License Pack	LX400-4701-7.1.4	LX400-4701W-7.1.4	\$803	€ 699
UW714 Enterprise Edition from UW711 Enterprise Edition	License Pack	LX400-4601-7.1.4	LX400-4601W-7.1.4	\$1,619	€ 1.409
UW714 Data Center Edition from UW711 Data Center Edition	License Pack	LX400-4101-7.1.4	LX400-4101W-7.1.4	\$3,119	€ 2.714

Users upgrading from Release 7.1.0 must first upgrade to Release 7.1.1 at no additional charge. This will require the use of a UnixWare 7.1.1 Media Kit (CD400-UW74-7.1.1).

UnixWare 7.1.4 Trade-Ins

The following are for trade-ins from SCO OpenServer 5, UnixWare 7.0.x, 2/1, SCO® UNIX 4.2, SCO Open Server® 3.0, or SCO XENIX® operating systems as noted. In addition to the Edition License, customers may need to purchase additional User and Processor License Trade-ins to reach the number of users or CPUs to be supported under the upgraded configuration.

Base (1-User) from Release 5 Desktop systems	License Pack	LX420-UW00-7.1.4	LX420-UW00W-7.1.4	\$479	€ 417
Base (1-User) from UW7.0.x Base Or UW2/1 Personal Edition	License Pack	LX420-UW10-7.1.4	LX420-UW10W-7.1.4	\$479	€ 417

Reliant® HA 1.1.4

ReliantHA is a clustering solution for enterprises requiring high levels of application and data availability. ReliantHA increases the overall availability of applications and critical data by connecting multiple servers together as nodes within a single high-availability fail-over cluster. Applications do not need to be aware of the operation of the cluster, and all nodes within the cluster may be used simultaneously for processing. Each node in the cluster needs to be licensed.

Single Server License	License Pack	LA490-0001-1.1	LA490-0001W-1.1	\$2,999	€ 2,609

SCO OpenServer 6

Product Name	Media	Product Model	Web Model	US\$ List	Eur€List
--------------	-------	---------------	-----------	-----------	----------

Description: SCO OpenServer® 6 is the most advanced version of the OpenServer family of operating system products. In addition to the new SVR5 kernel, major new features, markedly improved performance and support for the latest hardware, this release introduces significant enhancements to the default configurations for the Enterprise Edition and introduces a new Starter Edition designed for small business and edge of network applications. The Starter Edition replaces the Host and Desktop Editions.

SCO OpenServer 6 Upgrades and Trade-Ins

Upgrades: Upgrade licenses allow customers of OpenServer 5.0.7 and 5.0.6 to upgrade to OpenServer Release 6. All upgrades will require a fresh install of OpenServer 6. In-place upgrades are not currently supported. New for OpenServer 6 is the fact that all upgrade licenses are "Edition Sensitive" meaning that the correct license is required which corresponds to the Edition being upgraded. Two separate sets of upgrade licenses are available; one for upgrades from OpenServer 5.0.7 systems and one for OpenServer 5.0.6 systems. All CPUs, additional users, and Development Systems licenses will still be usable with OpenServer 6. Customers with SCO Update for OpenServer 5.0.7 will be able to use their SCO Update licenses in place of the corresponding upgrade license. Note: When using an Upgrade license to OpenServer 6, customers will be required to enter the current license for the system they are upgrading in addition to the Upgrade license.

Trade-Ins: All versions of OpenServer Releases 5.0.0 through 5.0.5 require a Trade-In license to bring the system current with OpenServer Release 6. Trade-Ins from earlier releases are not available. User licenses, and CPU licenses must be traded in as well. These licenses are available under the heading OpenServer 6 Trade-Ins. Customers with older variant 16-, 32-, 64-, 128-, and 512-User server licenses should contact their SCO representative to have these licenses converted to the appropriate combination of OpenServer 6 User Licenses.

OpenServer 6 Upgrades - Upgrades are Now Edition Specific

Upgrades to OpenServer 6 From OpenServer 5.0.7

--------------	-------	---------------	-----------	-----------	----------

SCO OpenServer 5.0.7 Upgrades and Trade-Ins

Contact your SCO Sales Office for requirements that apply in your region or for information about trading in from competitive products.

Current Customer Upgrades from Release 5.0.6

Upgrade: Upgrade licenses allow **only** customers of SCO OpenServer 5.0.6 to upgrade to SCO OpenServer Release 5.0.7. All CPUs, additional users, Optional Services components, and Development Systems will remain valid when the installation of the new license is completed.

Trade-In: **SCO OpenServer Release 5.0.5, Releases 5.0.4 through 5.0.0, or any release of SCO OpenServer 3, SCO Open Desktop, SCO UNIX, or SCO XENIX require a Trade-In license to bring the system current with SCO OpenServer Release 5.0.7.** User licenses, and CPU licenses must be traded in as well. These licenses are available under the heading Current/Previous Customer Trade-Ins. Customers with older variant 16-, 32-, 64-, 128-, and 512-User server licenses should contact their SCO representative to have these licenses converted to the appropriate combination of SCO OpenServer 5 User Licenses.

NOTE: Using an Upgrade or Trade-In license to SCO OpenServer Release 5.0.7, and selecting any of the Fresh installation options, you will need the current license for the system you are upgrading in addition to the Upgrade license. If you are using the Upgrade installation option, you only need the Upgrade license. See Late News at <http://www.sco.com/support/docs/openserver> for more information.

Inter-Edition Trade-In: Customers wishing to migrate from an SCO OpenServer Desktop or SCO OpenServer Host System to the SCO OpenServer Enterprise System must also purchase an Inter-Edition Trade-In license as well as an Upgrade or Trade-In license, to bring the system up to the current SCO OpenServer Release 5.0.7. These Trade-Ins result in a 5-User Enterprise System license. Any additional SCO OpenServer Release 5 User Licenses, CPU licenses applied to the original Host System will also apply to the Enterprise System. If trading-in from a pre-Release 5.0.7 system, the appropriate Current Customer Upgrade or Previous Customer Trade-In to Release 5.0.7 must first be purchased, for example from Host 5.0.4 to Host 5.0.7, and then to Enterprise 5.0.7.

SCOoffice Server

Product Name	Media	Product Model	Web Model	US\$ List	Eur€List
--------------	-------	---------------	-----------	-----------	----------

Description: SCOoffice Server 4.2 delivers a reliable, full-featured Internet e-mail and collaboration solution for SCO UNIX servers. Designed with comprehensive security features, SCOoffice prevents e-mail viruses from reaching users, filters out junk e-mail, and secures e-mail access. Providing more than just e-mail services, SCOoffice also delivers a real-time collaboration solution for scheduling group meetings, sharing contact lists and address books, and managing group to-do lists and tasks. For convenience, SCOoffice integrates with Microsoft Outlook and industry-standard Web browsers. Empowering non-technical users such as office managers, secretaries, and assistants, SCOoffice features a friendly interface for setting user and environment preferences. SCOoffice Server 4.2 is compatible with SCO OpenServer 6 and UnixWare 7.1.4.

SCOoffice Server 4.2
